Lloyds Banking Group
Cardiff

Dear Mr Millet,

Re: Industrial Placement

I wish to apply for the role of Risk Analyst that you spoke about at Cardiff University and have attached my CV accordingly.

As a Maths student my degree has provided me with the perfect skills for this position. In particular, it involved a great deal of problem solving skills combined with understanding complex and technical topics. Doing a summer research placement has also shown that I am very self-motivated and able to communicate effectively when working as part of a team.

I am a quick learner with keen interest in the financial sector and I would be very grateful for the opportunity to start my career with Lloyds. Thank you for taking the time to look at my application, I look forward to hearing from you in the future.

Yours Faithfully,

James Campbell
